REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or to fairly suggest the earpiece including a connection tube specifically constructed as claimed.

Specifically, the prior art of record fails to teach the provision of a *retainer* for the connection tube, wherein the retainer is specifically constructed to included a *raised ring* and *retaining ridge*, cooperating together to mate and secure the connecting tube with an elongated projection.

The retainer is further described as being *in combination with structure* which permits the longitudinal adjustment of the connecting tube along the length of the projection member, and wherein the retaining ridge also operates to function as a means for preventing disengagement of the connecting tube from the elongated projection when the connecting tube is being adjusted in longitudinal direction away from the elongated projection.

Discussion of related prior art references:

Taenzer (6,009,183)

While figure 1 teaches an elongated projection (32) having thereon a retaining ring (38), as well as what may be interpreted as a retaining ridge (35) in figure 5, Taenzer teaches that the ring (38) is fixedly held within ridge (35) without any provision for adjusting tube (30) in a longitudinal direction along the length of projection (32).

The same explanation holds true for Figure 3 of **Schlaegel (US 5,975,235)**, Figure 3 of **Jelonek (US 4,381,830)** and Figure 1 of **Vignini (US 3,813,499)**.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
